

INVENTOR TUTORIAL

ADVANCED CADD

You have now had the opportunity to 3D Print an object of your choice on the Drafting Labs Afinia 3D Printers. The next step in this process is to DESIGN a Tutorial for your peers to complete. Your ultimate goal is to complete a tutorial that will CREATE and PRINT an object of your choice. Your evaluation will be combine presentation and ease of tutorial, as well as finished product. Your peers will be testing out your tutorial once submitted.

Be sure to make your tutorial simple, easy to understand and visually pleasing.

Your tutorial must include the following:

A minimum of 18 steps

Visuals (print screen images)

Instructions/text

Images of the final product.

Do not forget to include the INVENTOR steps, as well as the steps required to print on the AFINIA H800 printers.

You can use other tutorials to guide your way, but you cannot create the same tutorial online. ALL TUTORIALS USED MUST BE QUOTED. Any plagiarism will result in a zero for this assignment.

You will be required to complete your peer's tutorials upon completion.

GOOD LUCK and HAPPY PLANNING!
