

**USING CLOUD
COMPUTING
IN THE CLASSROOM**

Dropbox

DESCRIPTION

A place in 'the cloud' to safely store (and share) documents.

OUTCOME

GLO 12.3: Create, maintain, and present a portfolio.

ANIMOTO

DESCRIPTION

Online video-maker and slideshow creator. This allows users to create unique presentations to show off photos and videos.

OUTCOME

GOAL 4: Present Design solutions.

GLO 4.2: Use presentation production methods.

DESCRIPTION

Online database that allow you to browse and save millions of interior design and decorating ideas.

OUTCOME

GLO 1.2: research and analyze verbal and numeric information for design solutions.

11B.S.1.2.1: consider aesthetic principals (eg. Colour, balance, texture, form proportion) in relation to interior and exterior residential design.

DESCRIPTION:

A sharing service that allows users to 'pin' to a personal 'board'. This allows them to organize and share with others within the Pinterest world.

A digital Bulletin board.

Allows people to create dream/inspiration boards.

OUTCOME

11A.S.5.3.6: Use information communication technologies(eg. RSS feeds, blogs, technical websites, discussion boards) related to architectural/engineering design drafting.

DESCRIPTION

An online tool that allows users to develop unique multimedia presentations.

OUTCOME

11B.F.7.3.1: Identify the economic sustainability factors that influence architectural design solutions (eg. local versus imported products, cradle to cradle, recycled materials).

12B.F.7.3.1: Identify economic sustainable materials and building systems that affect architectural design solutions (eg. solar, geothermal, wind, hydroelectric, renewable materials).

DESCRIPTION

An app (or website) where users can post their own photos and share with followers. Users can also observe others posts.

OUTCOME

11B.F.81.2: Describe emerging styles and trends (eg. building use, life of building, evolution of building, flexible housing, and home office) and their impact on architectural design.
